JOSE NITHIN A

QA/QC INSPECTOR

+974 77023054 jnithin044@gmail.com

PERSONAL PROFILE

Highly skilled Quality Professional with a unique blend of expertise in Mechanical Inspection and Database Development. Proficient in applying GD&T and ISO quality systems to physical components while leveraging Oracle PL/SQL to manage and optimize data integrity. Experienced in the BFS and Heavy Engineering sectors, with a consistent record of reducing non-conformances and optimizing system performance through meticulous documentation and technical troubleshooting.

WORK EXPERIENCE

Bharat Heavy Electricals Limited - Trichy, India 2023 - 2024
QA/QC Inspector

- Successfully executed 100% of dimensional and visual inspections for piping/mechanical components, ensuring adherence to ASME/API specifications.
- Verified materials against MTCs and ensured proper storage and handling.
- Performed initial quality checks on incoming raw materials from suppliers, preventing defective materials from entering the production line.
- Conducted fit-up and final welding inspection for CS, SS, and alloy pipes.
- Coordinated with third-party and client inspectors for joint inspections.
- Streamlined the process of maintaining quality documentation (ITPs, welding logs, QC reports) for all assigned projects to ensure ISO 9001 audit readiness.
- Drove the non-conformance process by raising and tracking NCRs and collaborating with production to implement corrective actions, reducing recurring defects.
- Gained proficiency in complex dimensional checks and welding inspections (e.g., using XRF Analyzer) by actively supporting senior inspectors.
- Maintained strict compliance with ISO 9001 standards through continuous process auditing and adherence to internal QA/QC procedures.
- Managed material traceability and inventory (in/out/stock) using SAP Software, directly supporting timely and accurate material issue to production.

LTM - Chennai, India 2024 - Apr 2026
Software Engineer

- Developed PL/SQL procedures to aggregate data from multiple regional branches. Implemented partitioning on transaction tables to improve query performance on historical data.
- Designed and developed robust PL/SQL packages, stored procedures, functions, and triggers to support core banking modules and transaction processing systems.
- Data Processing (ETL): Managed high-volume data loading processes from external flat files into Oracle tables using SQL Loader and External Tables, ensuring data consistency across environments.
- Bulk Processing: Implemented Bulk Collect and FORALL features to handle millions of records efficiently, significantly reducing context switching between SQL and PL/SQL engines.
- Reporting: Automated daily and monthly regulatory reports required by the client, ensuring 100% accuracy and adherence to strict financial compliance standards.
- Collaboration: Collaborated closely with Java front-end developers and business analysts to map requirements to database schema designs and resolve data retrieval bottlenecks.
- Migration: Assisted in database migration activities from Oracle 11g to 19c, including testing and validating invalid objects.

RKH Qitarat - Doha May - Aug 2026
PIC(Person In Charge)

- Supervised & Guided Workflows: Led a team of 15 technicians and workers during complex mechanical site operations, delegating daily maintenance and installation tasks while ensuring strict adherence to project timelines.
- Safety Leadership & Tool Tool Meetings: Conducted daily Toolbox Talks (TBT) and safety meetings, successfully embedding zero-harm HSE cultures and ensuring 100% compliance with Qatar Rail / RKH Qitarat safety regulations.
- Permit to Work (PTW) & Documentation: Administered seamless check-in and check-out procedures, shift handovers, and documentation compliance for personnel entering restricted mechanical work zones.

- Site Supervision & Quality Control: Continuously monitored active mechanical work environments, performing real-time site hazards risk assessments and verifying work quality against engineering specifications.
- Work at Height (WAH) Certified: Specialized in working safely at elevated heights, ensuring proper rigging, fall arrest system setup, scaffolding inspections, and adherence to elevated site safety protocols.
- Lockout/Tagout (LOTO) & Energy Isolation: Managed safe isolation protocols for rotating machinery, mechanical systems, and pressurized equipment prior to permitting team intervention.
- Incident Prevention & Hazard Identification: Identified potential mechanical hazards, unsafe acts, and mechanical equipment defects early, executing immediate corrective actions to prevent downtime and injuries.

Sama Steel - Doha Sep 2026 - Present
QA/QC Inspector(Civil)

- Drafted, prepared, and managed comprehensive technical project documentation, including Subcontractor Prequalifications and Material Submittals.
- Prepared Material Approval Requests (MAR), efficiently addressing client comments, rectifying technical discrepancies, and resubmitting for swift final approval.
- Generated, processed, and tracked Material Inspection Requests (MIR) and Work Inspection Requests (WIR) to verify adherence to project specifications and client standards.
- Conducted rigorous pre-execution site checks against AutoCAD plots to ensure all civil works proceeded with exact dimensional and technical accuracy.
- Prepared, coordinated, and secured daily Permit to Work (PTW) documentation to authorize the safe and compliant execution of site operations.
- Enforced stringent on-site health and safety protocols for self and crew members during all phases of site work execution.

EDUCATION

2019 - 2023
Sri Ramakrishna Engineering College - Coimbatore, India
- B.E, Mechanical Engineering.
- CGPA: 7.5/10

2018 - 2019
Keins Matric Her Sec School - Vallioor, India
- 12th Computer Science Group
- Marks : 455/600

2016 - 2017
Keins Matric Her Sec School - Vallioor, India
- 10th Standard
- Marks : 474/500

SKILLS

- Quality Management Systems (QMS): ISO 9001, API, ASME, ASTM.
- Precision Metrology: CMM, Vernier Caliper, Micrometer, XRF Analyzer, Height Gauge, Bore Gauge. GD&T.
- ERP/QMS Software: SAP.
- Languages : SQL, PL/SQL, Unix Shell Scripting.
- Databases: Oracle 19c.
- Tools: Oracle SQL Developer, PL/SQL Developer.
- Version Control & Scheduling: Git, Bitbucket, AutoSys.
- Data Analysis Tools: MS Office (Excel, Word, Outlook).
- Effective Communication.

CERTIFICATIONS

- OSHA 10 Hour & 30 Hour General Industry Safety and Health
- Introduction to Quality Control by NPTEL from Alison
- White Belt Certification by The Council of Six Sigma Certification(CSSC)
- Lean Six Sigma Yellow Belt from Sparen & Gewinn
- NDT Level - 2 Course in Udemy
- Oracle Database SQL Certified Associate
- Oracle Cloud Database
- Oracle AI Assistant

PERSONAL DETAILS

- ID No : 30235618634
- ID Expiry : 26/02/2027
- Passport No : W9600556
- Passport Expiry : 31/01/2033
- Nationality : Indian
